PLAYGUITARHITS

Play Guitar Hits, the new application to learn your favorite songs on guitar.

June 2019: App Steel and Arobas Music, the creator of the tablature and music-notation software Guitar Pro, is launching Play Guitar Hits, an application to learn the greatest hits on guitar using videos synchronized with the score. It is now available on the App Store.
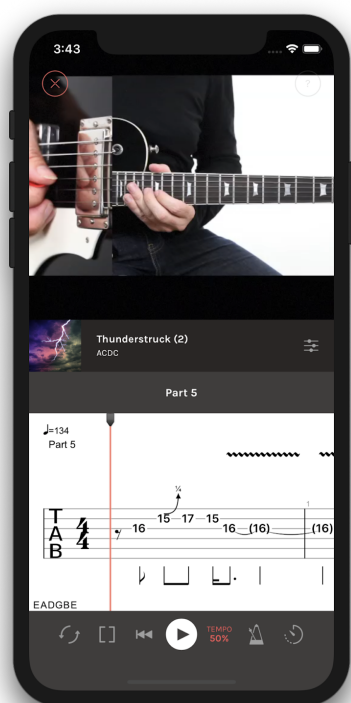

Features

Choose the video to display: left hand, right hand or both as well as the musical notation: tablature, standard, slash (rhythm notation). And when scrolling the interactive score, the video stays in sync.

....

Each song is divided into short parts to learn the songs step by step.

....

Backing tracks with vocals and accompaniment are available for every song.

....

Many practising tools make learning easier: metronome, countdown, adjust tempo, loop a section.

"Video and sheet music are both essential tools for learning how to play the guitar. Play Guitar Hits displays simultaneously: the fingers on the neck, the movements of the right hand and the score. " Franck Duhamel, co-founder of App Steel.

More than 50 songs available in in-app purchases

The Play Guitar Hits catalogue contains many songs in numerous musical genres for electric and

acoustic guitars. Among the titles available are songs by AC/DC, Muse but also Oasis and Adele. New songs are regularly added.
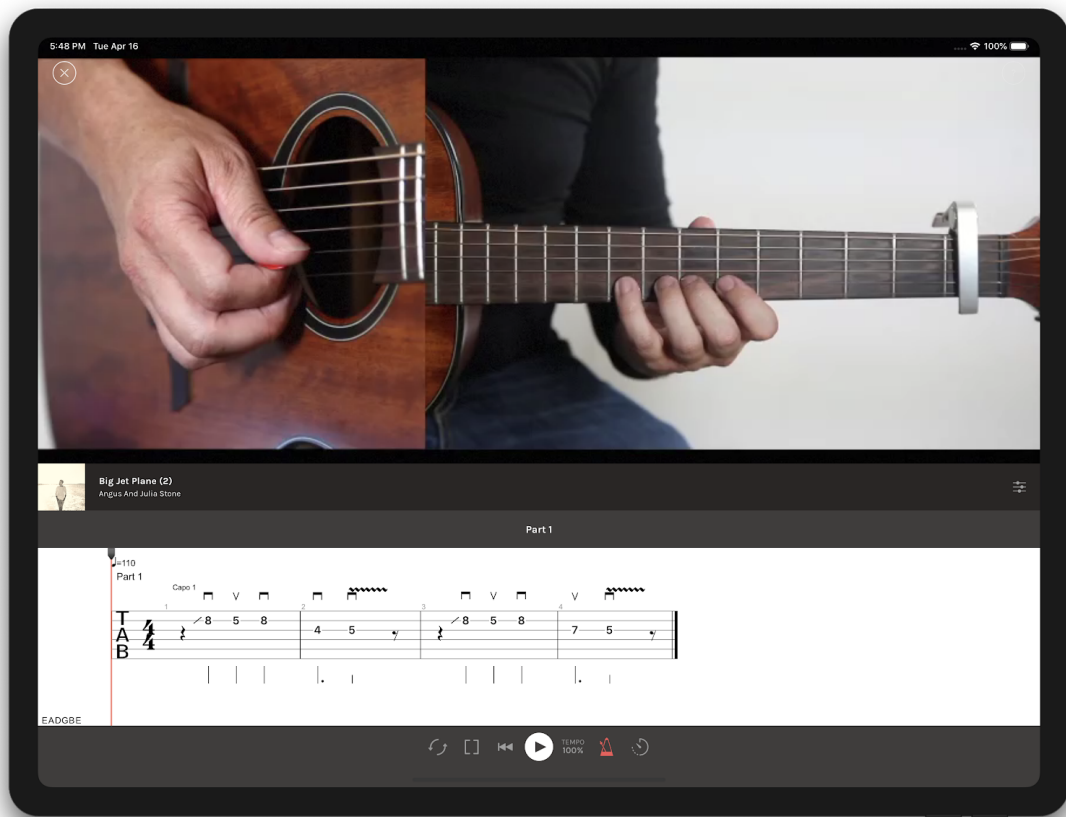

Download and pricing

The application is available for free on the App Store with 3 songs to test. More than 50 famous songs are available as in-app purchases for 2,29 EUR or USD 3.

Media

The Play Guitar Hits media kit containing logos and screenshots for iPhone X, and iPad Pro can be downloaded here.
